

Bay Area SMACNA Lunch and Learn

The Future of Construction

How being more data-driven can improve Project Performance

Companies interested in exploring methods for improving project cost controls, labor productivity, and communications between the Office and Field will find this presentation especially helpful.

Learning Objectives:

- Steps you can take today to begin transitioning to a data-driven business
- Establishing a “Data Quality Culture” around field data
- Aligning field data collection methods with project planning and reduced risk
- Case studies highlighting how contractors are seeing dramatic time savings and improved morale by going paperless in the Field
